Disease Control  
Atlanta, Georgia

**Bldg. 17, Phase I and II -**  
**(Estimated construction cost \$40 million phase I and \$25 million phase II)** Mr. Simpson was the Structural Project Engineer for this eight-story structure. The structural framing system consisted of concrete columns with pan and skip-joists framing system with concrete shear walls for lateral stability. The foundation consists of concrete drilled piers, and continuous perimeter foundation retaining walls. Additions construction consisted of concrete and wood pedestrian bridges and utility and pedestrian underground tunnels.
